

CHARLES M. BENNETT AND LORAINÉ BENNETT RAE MAP COLLECTION

1923-1993

131 maps

Provenance

Most of the maps in this collection were gathered by Charles M. Bennett of Jonesborough for genealogical/historical research. His daughter, Loraine Bennett Rae also assisted in this research and collected maps as well. She inherited her father's collection upon his death in 1974. In turn, Rae gave both her father's and her own maps to Betty Jane Hylton of Johnson City, Tenn., before Rae moved to Portland, Oregon in the early 2000s. Mrs. Hylton donated the maps to the archives on July 17, 2017.

Scope and Content Note

The collection consists primarily of United States Geological Survey topographic maps used by Charles M. Bennett in his research on Washington County cemeteries. This research was eventually published in a three-volume work titled *Washington County, Tennessee Tombstone Inscriptions* (1977-1979). His notes and markings are found on the maps. Also included are other types of maps such as highway maps, navigation maps, geological maps, and reproductions of historic maps primarily related to Tennessee and the southern United States. Later maps were used by Bennett's daughter, Loraine B. Rae in her research.

The topographic maps are arranged by state (Tennessee and Virginia) and then alphabetically by geographic location. In cases where there are multiple maps for the same quadrangle, these maps are further arranged in chronological order. Following the topographic maps, miscellaneous maps are filed at the end of the collection in alphabetical order by map title.

* An asterisk indicates that the department has a digital copy of the map. These are found in the Gordon Edwards Digital Map Collection.
